

# INDUSTRIAL MAINTENANCE & WATERPROOFING EXPERTS ALL ROUND UAE & KSA REGION

### MISSION STATEMENT

To maintain our status as a leader in technical services and engineering by providing our clients with the highest quality, most comprehensive services ensuring their increased safety, reliability, and profitability.

**Promax** will achieve this by adhering to its core values; providing services that will enhance the availability of the client, while minimizing financial loss due to unplanned outages. **Promax** will deliver ongoing project cost-savings by decreasing maintenance costs through consistent, efficient and accurate inspections and engineering services, inclusive of prioritized recommendations, capital budgeting, scheduling, and resource allocation for future outages. Also, our clients have acquired markedly improved safety records as a result of the premier services we provide.

### VISION STATEMENT

Promax differentiates itself from its competitors by providing services to clients that have enabled them to be most cost-effective and thus, actually impact the bottom line profitability of its customers.

It is important for Promax to support the client's planning team, and we provide a supporting role in the entire management process, offering vital assistance in all technical services and engineering disciplines. Support services are provided throughout the whole process, as it is imperative to identify that process, and where **Promax** integrates synergistically with its clients.

**Promax** strives to be the premier technical service and engineering consulting company for the utility, power, chemical, refining, food processing, pharmaceutical, and manufacturing industries, regionally and ultimately across the nation. We will achieve this primarily through the continuous enhancement of our operational and technical capability, to provide clients the best value proposition.

## THE TEAM

Engr. Shoeb Khan (Managing Partner)

Having Civil Engineering Degree and 16 years experience in the fields of Civil Works / All Kinds of Interior Works as well as Glass & Aluminium Works.

He has strong leadership skills to turn the company business towards prosperity and having multiple resources for execution of the projects with precision and timely execution respectively.

Shoeb has in depth knowledge and handles all the matters pertaining to technical executions.

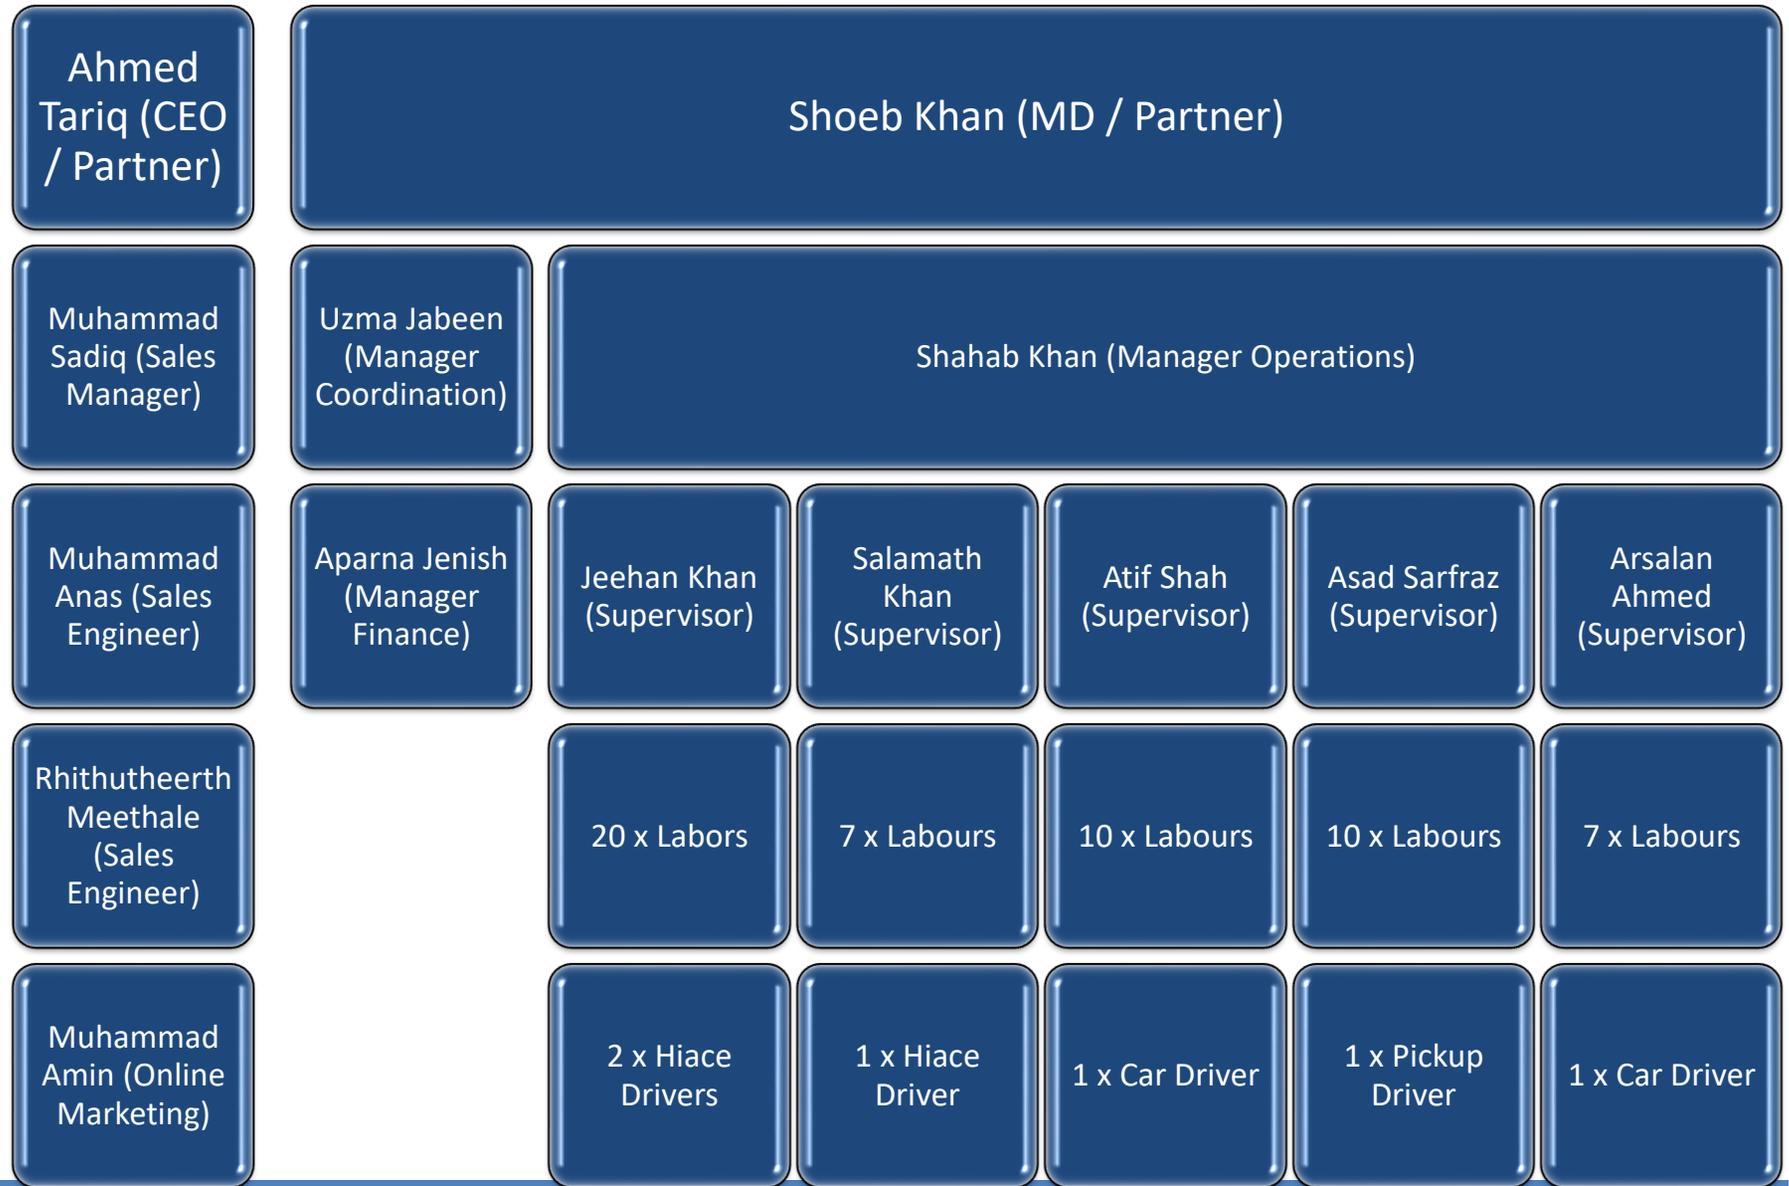

Engr. Ahmed Tariq (Managing Partner)

Ahmed is a KNX Automation Engineer from Building Automation Center Lebanon and is a highly skilled Entrepreneur with strong background in Repair and Maintenance works in all kinds of Industrial Buildings with more than 18 years of working experience in different key positions. Ahmed has high level of understanding and in depth knowledge in the fields of all kinds of Waterproofing Solutions in metal roof & concrete roof. In addition to this, he is having vast knowledge in KNX Home Automation, LED Industrial Lighting Designs and implementation as per International Standards, CCTV Security Systems, Aluminum Pergolas fixed and automated types, Car Parking Shades, Solidworks Design Engineering, Microsoft Certified Web Developer, 3D Simulations in Dialux Evo 10, Adobe Premier Pro, Adobe Photoshop, 3D Max, Networking Solutions and other state of the art computer programs for precise design / calculations and project estimations. He is also specialized structural engineer to design all the projects using TEKLA Structural Designer and TEKLA TEDDS software's.

# INDUSTRIAL MAINTENANCE & WATERPROOFING EXPERTS

### OUR SERVICES IN A GLIMPSE

## OUR SERVICES

- Waterproofing Solutions for Metal Roofs / Warehouses / Logistic Centers / Sheds
- All Kinds of Epoxy Flooring for Industrial Buildings
- Slab Works / Foundations / Flooring / Road Base with Load Calculations
- Eave & Gutter Waterproofing
- Single Skin Roofs / Sandwich Panel Roofs
- Rusted Purlin Replacement
- Concrete Parapet Wall Waterproofing
- Pipe Penetrations
- Interlock System
- Stainless Steel Cladding
- CAT Ladders
- Spiral Ladders

## Some of Our Valued Clients

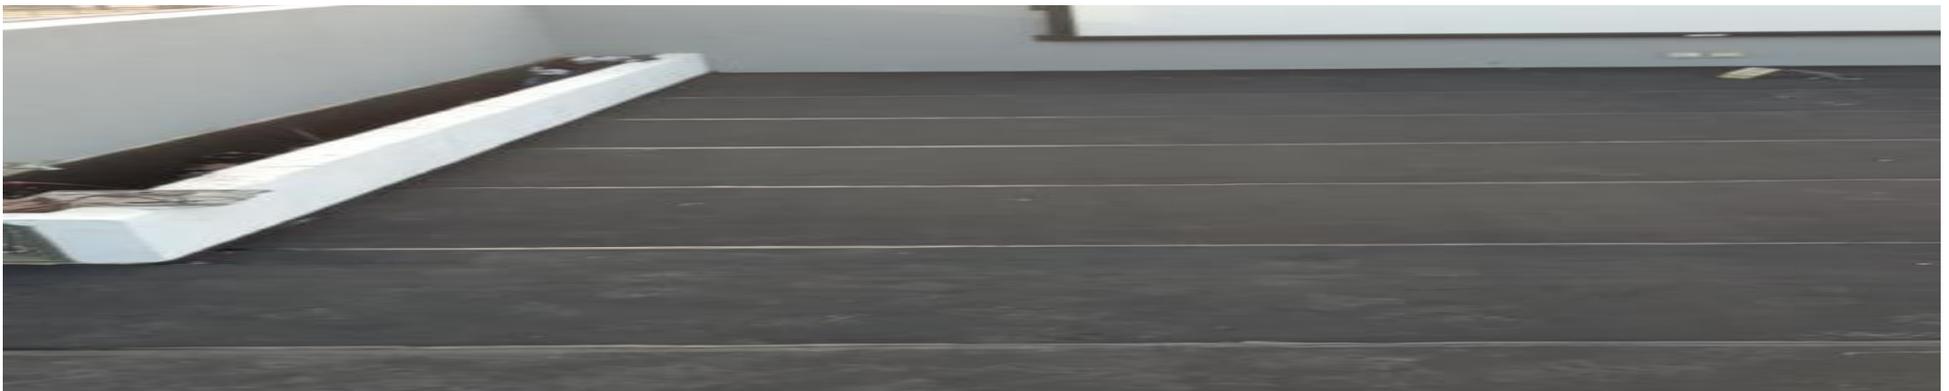

## Different Types of Epoxy Flooring Coatings

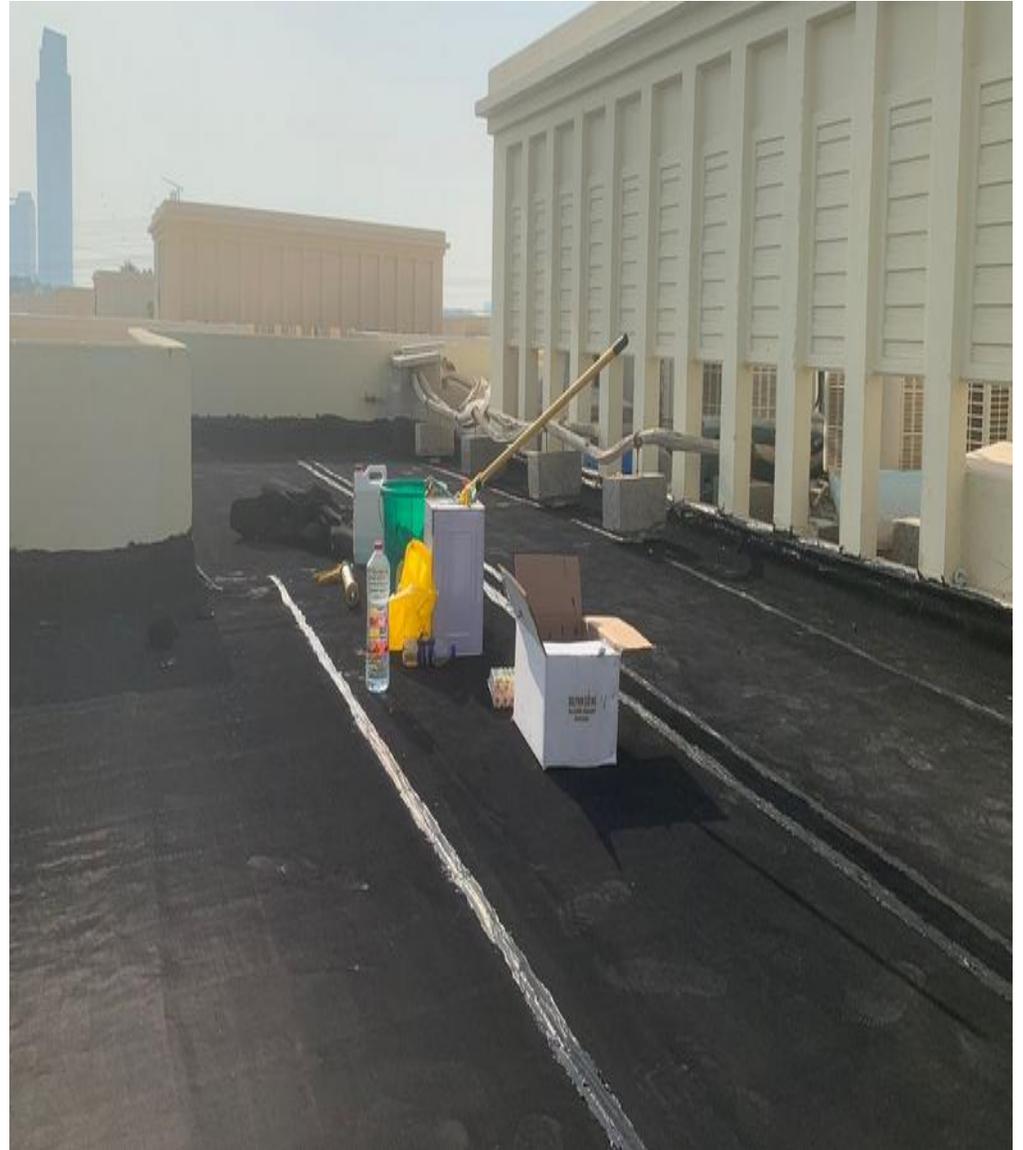

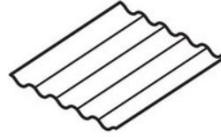

**CONCRETE**

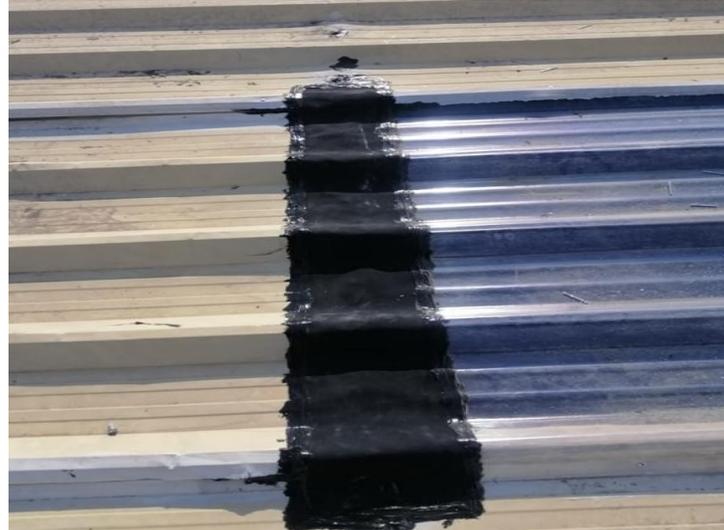

**CONCRETE ROOF WATERPROOFING**

## METAL ROOF WATERPROOFING

## RESERVOIR TANK WATERPROOFING

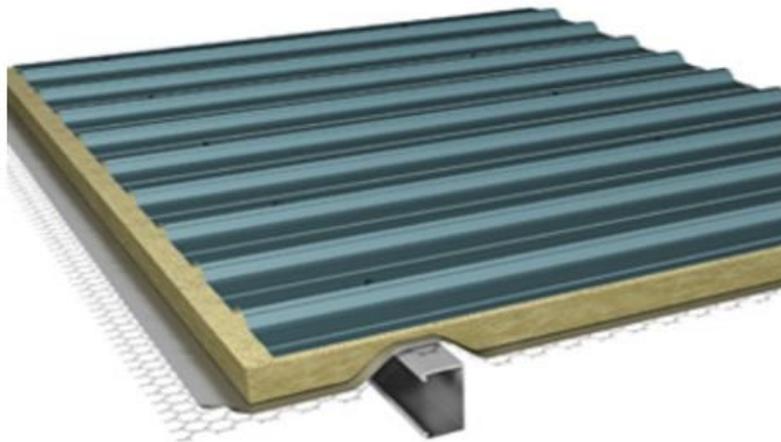

## SINGLE SKIN / DOUBLE SKIN / PURLIN REPLACEMENT

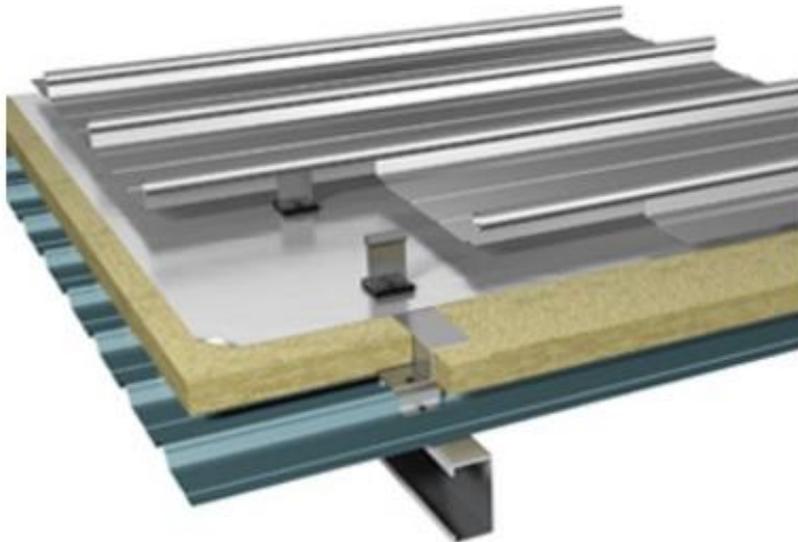

### SINGLE SKIN ROOF SYSTEM

In single skin roof system, insulation is installed below the metal cladding sheet held by steel wire mesh and aluminum foil rolled over purlins. This roofing system is an economically sound option for the construction industry. ThermalRock B, a non-combustible light weight thermal insulation blanket provides an ideal insulation solution to single skin roofing system.

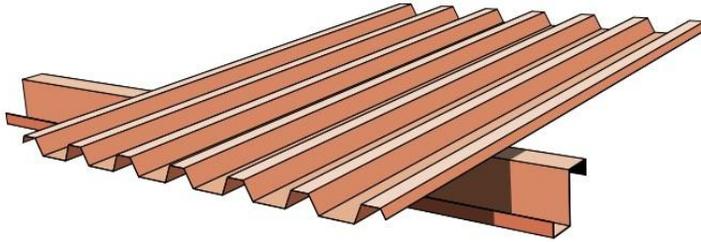

## DOUBLE SKIN ROOF SYSTEM

The double skin roofing system is a high performance system comprising of an aesthetically designed trapezoidal or standing seam profile metal sheet on the top and a metal trapezoidal tray at the bottom. Coupled with ThermalRock S stone wool insulation, it boost the performance of the system with improved level of thermal efficiency, acoustic and fire performance as compared to other roofing system. ThermalRock S, a semi rigid slab product, is a versatile insulation that is available in various sizes to provide ease of installation and a perfect fit between purlins.

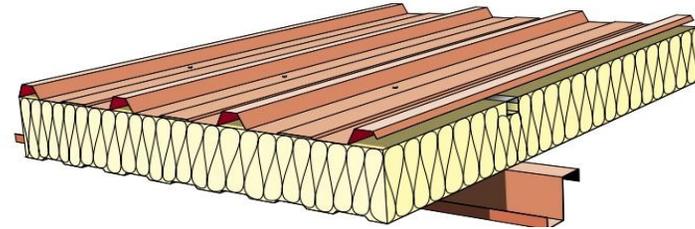

### 1.2 Single skin system

An uninsulated profiled metal sheet fixed directly to the purlins.

### 1.3 Double skin system

This common type of construction consists generally of a shallow profiled metal liner, a spacer system and an outer sheet usually in a deeper profile. The insulation is typically a mineral fibre quilt.

### 2.1 Profiled sheets

Profiled weather and liner sheets are made of steel to BS EN 10147 or aluminium to BS EN 485 (and related standards).

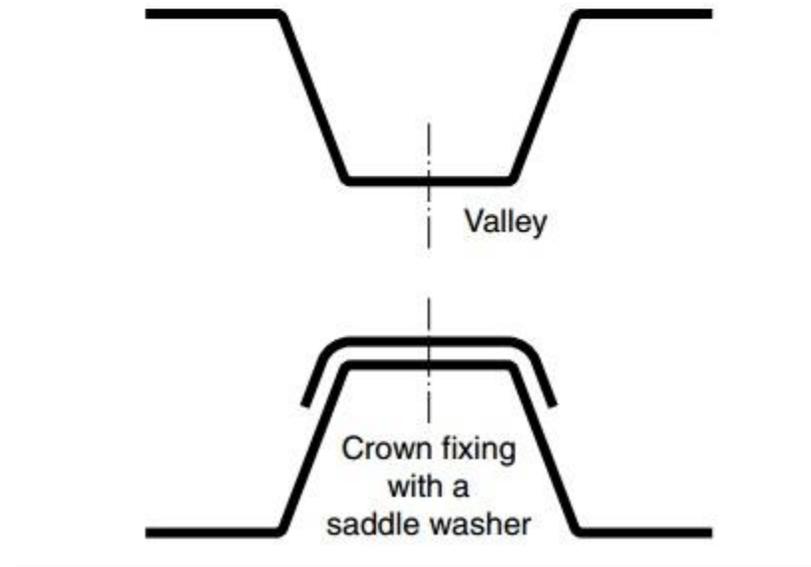

Thicknesses vary depending on product and application but the values in Fig 6 are generally regarded as minimum values in mm.

	STEEL	ALUMINIUM
Weather sheet	0.7	0.9
Liner sheet	0.4	0.5
Walkable liner sheet	0.7	0.9

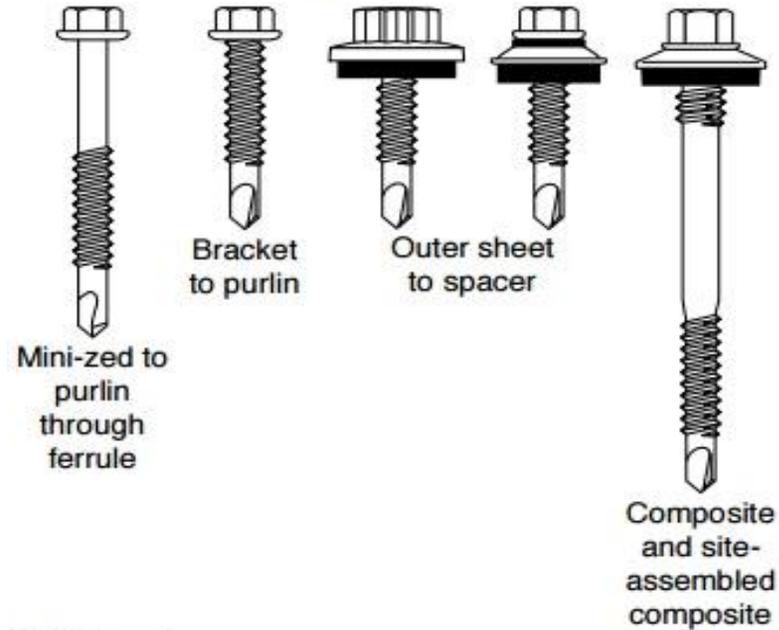

Type	Substrate	Typical thickness: microns	Application
Plastisol	steel	200	weathersheet
Pvf2	steel and aluminium	25	weathersheet
Multicoat	steel and aluminium	100	weathersheet
ARS	aluminium	28	weathersheet
Polyester	steel and aluminium	22	liner

## *a) Primary*

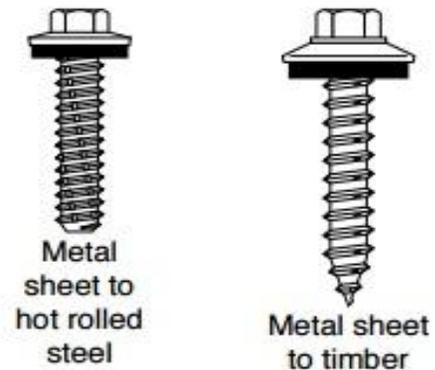

These fasteners are designed to transfer all loads on the cladding system back to the supporting structure so their strength is particularly important. If the fasteners are exposed they must also provide a weathertight seal. They are normally used in the valley of the profile. If crown fixing is recommended by the manufacturers, saddle washers are usually required.

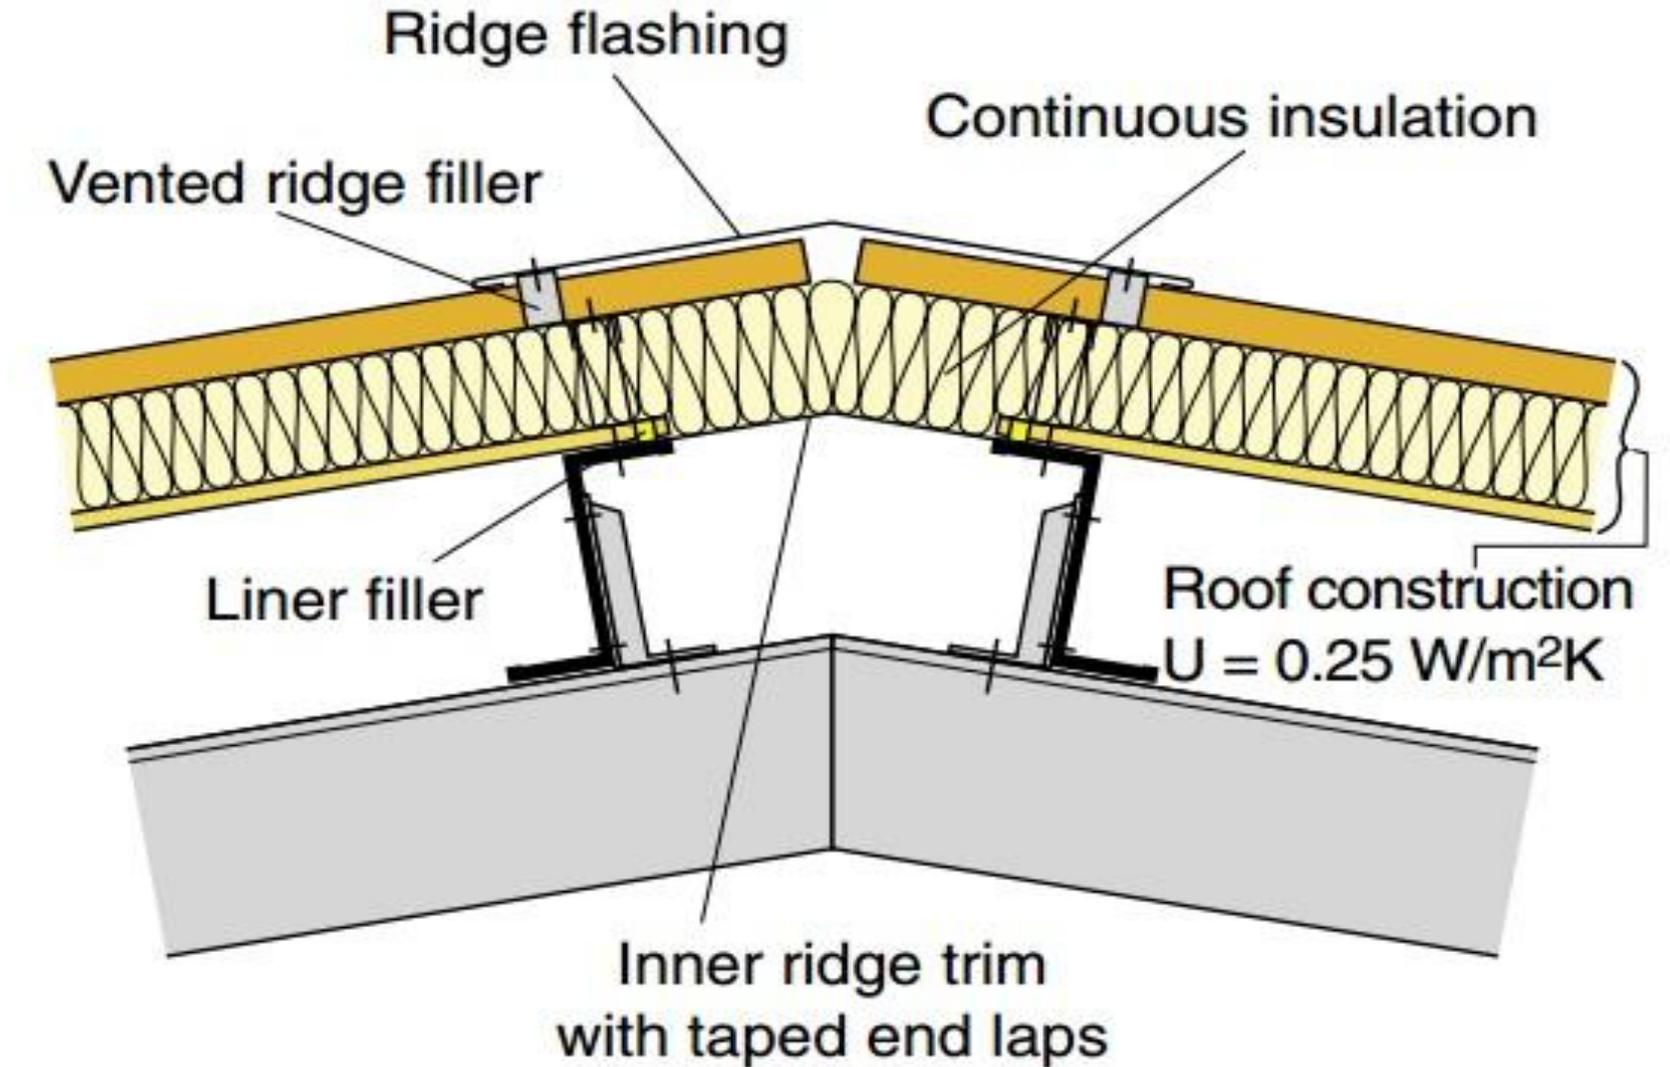

## Self drilling and tapping

## Self tapping

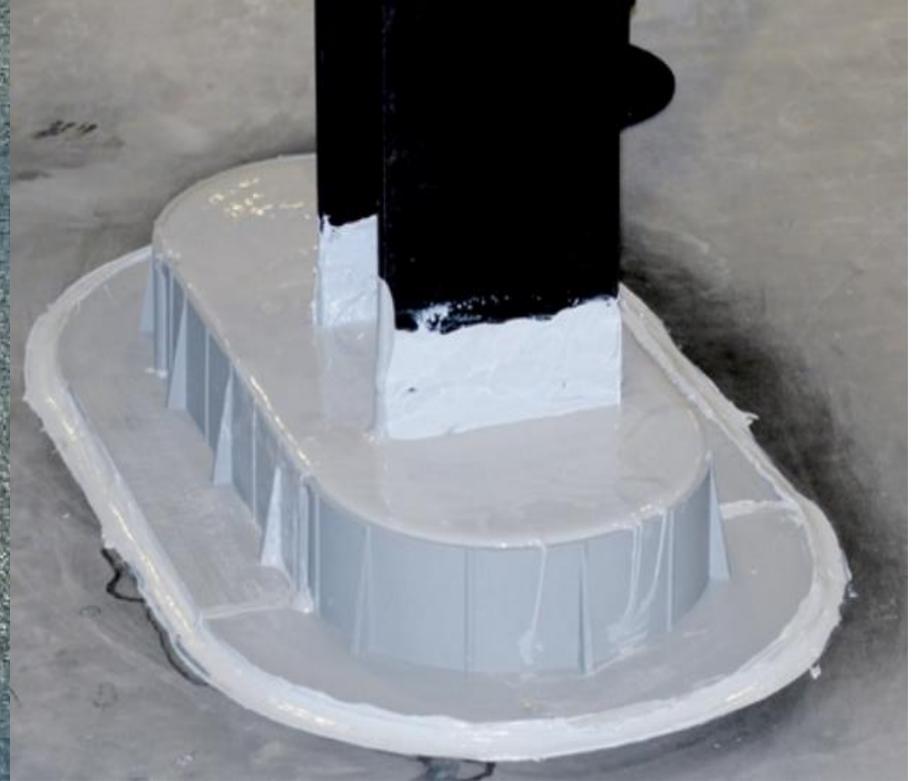

## COLUMN TREATMENT / PIPE PENETRATION / CABLE WATERPROOFING

## WORKMEN'S COMPENSATION INSURANCE CERTIFICATE

### TO WHOMSOEVER IT MAY CONCERN

03/11/2025

We confirm that **M/S. Promax Carpentry & Flooring Contracting Co** is insured with us under Workmen's Compensation Insurance as per the following details

**Insured's Name** : Promax Carpentry & Flooring Contracting Co  
**Address** : P.O.Box 242193 , Office No. 505 , Dubai , United Arab Emirates  
**Policy No** : P/01/6021/2024/3613/1  
**Period of Insurance** : From : 29/10/2025 00:00:00 To : 28/10/2026 23:59:00  
**Cover** : As per UAE Federal Labor Law no 8 of 1980 and subsequent amendments thereto  
**Employer's Liability** : AED 1,000,000.00 Any one occurrence and in the aggregate  
**Insured Employees** : 36 Employees  
**Territorial Limit** : United Arab Emirates  
**Law & Jurisdiction** : United Arab Emirates

All other Terms, Conditions, Exceptions as per the original Policy issued to the Insured.  
This Certificate is issued as per the request of the Insured.

## Detailed Site Survey's and Relevant Reports for problem identification and providing appropriate solutions with EPDM & Promax Bonding Adhesive:

### GUTTER PROBLEM

The major problem is the Pigeons, as they consider the gutter holes to be their nest and then they enter in it and die causing serious blockage.

So these should be covered with floor trap / gutter cover to prevent them for entering. Now when they go in and die the water clogs up and then slips in between the sheet and gutter terminations as explained above.

**AREA 3**

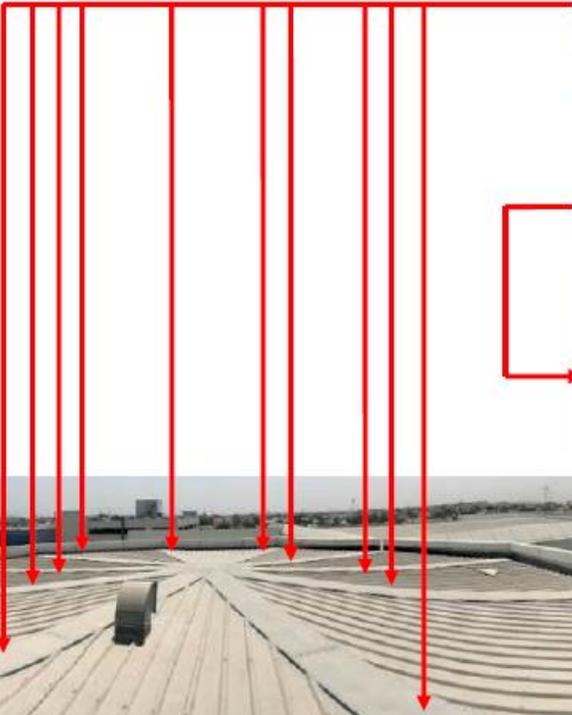

**SOLUTION:**  
All the overlaps needs to be cleaned properly by removing the old coatings and to be sealed with the imported EPDM on both the sides as well as we need to seal the 2 x Duct Penetrations shown here.

Total Diameter Length is 60 Meters of the Gutter of this round roof. All proper drains are here in this area as it has 8 Drains of around 3" Dia which is sufficient.

However there are 10 overlap areas that are covered with the older coating which seems to be cause of the leakage. The length of each duct from end till the center is 9 Meters.

And each overlap has 2 sides. Therefore, 9 Meters x 2 Sides x 10 overlaps = 180 LM

This area also has 2 Duct Penetrations inside the roof which is around 1 Meter x 4 sides x 2 Duct Penetrations = 8 LM

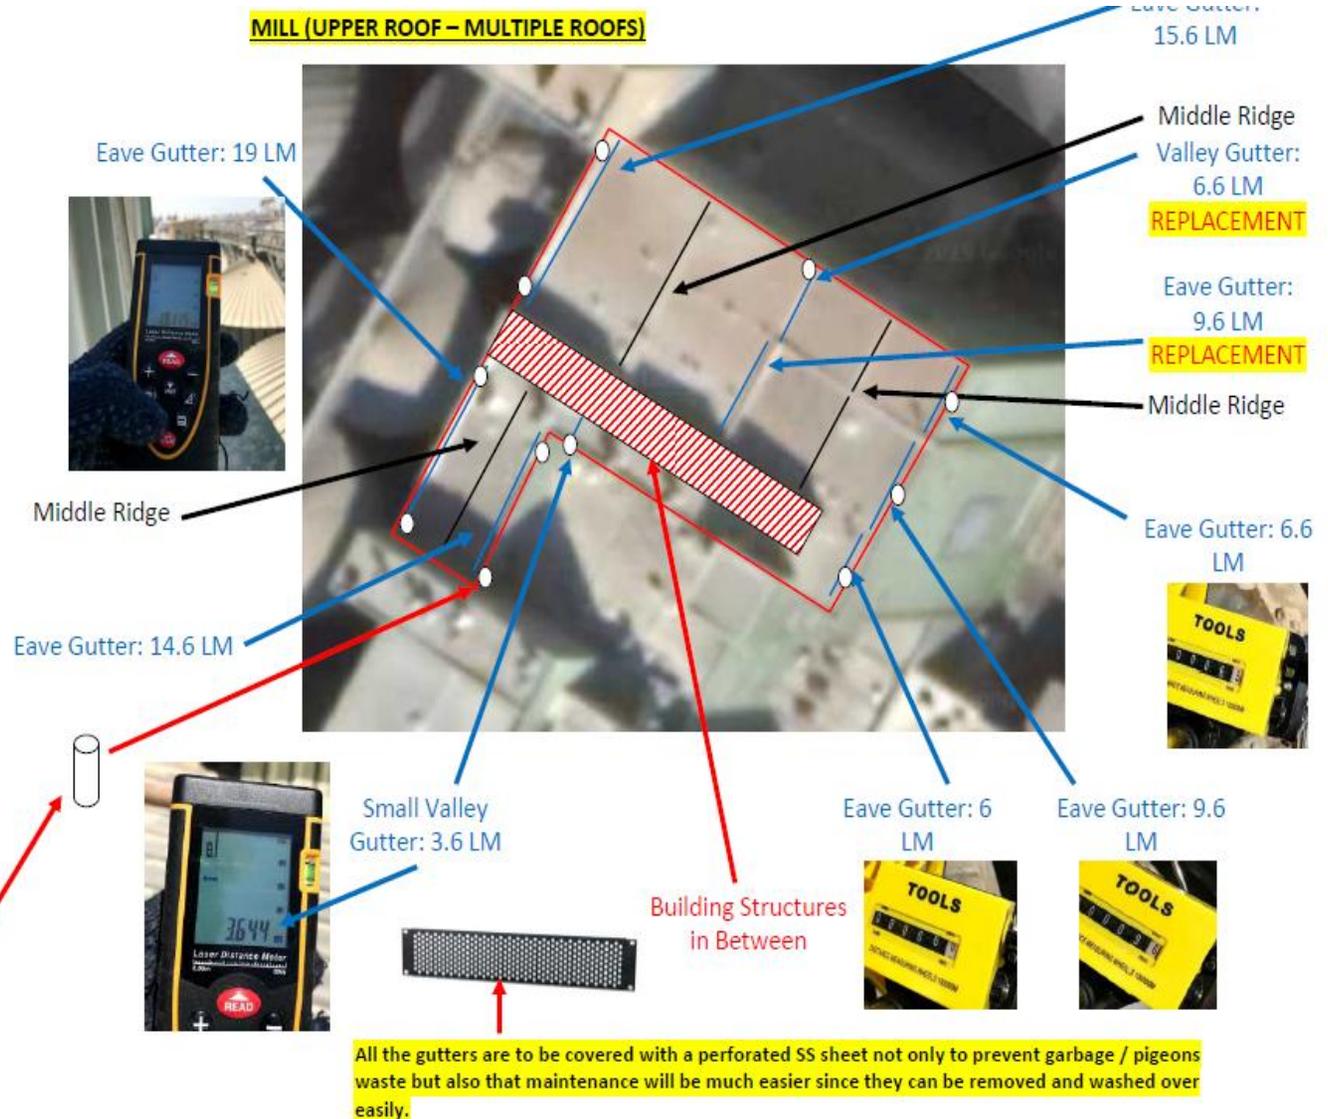

Full Panoramic View of this roof taken from this point.

This has multiple Gutters & Middle Ridges. Its difficult to explain this roof, The area marked within the red line is the roof areas. The Area marked with white background and red lines are building structures in the middle. However, it is explained in detail in the best possible way.

Gutters are marked with **BLUE** Lines

Middle Ridges are marked with **BLACK** Lines

11 X Core Cuts required

WATERPROOFING OF METAL ROOF:

TOTAL AREA: 7620 SQ. MTRS

Total Number of Laps = 8 Nos.

Different Size Laps =  
 $77+77+90+85+85+82+82+79=657$  LM

Sky Lights = 83 Nos.

Each Skylight 8 LM x 83 Nos. = 664 LM

Flashing repairs = 40 LM Approx.

**AREA SEGREGATIONS / TOTAL SCOPE OF WORK (Sr # Are based on the Proposal)**

**Roof # 4 – Metal Roof (Sr. 12 & 13)**

Total Area: 2420 Sq. Mtr. consisting of 14,520 Screw Heads

Sealing of TOTAL END LAPS: End Laps x 7 Nos. x 50 LM = 350 LM x 22% corrugation Slope = 427 LM

**Roof # 3 – Metal Roof (Sr. 10 & 11)**

Total Area: 2675 Sq. Mtr. consisting of 16,050 Screw Heads

Sealing of TOTAL END LAPS: End Laps x 2 Nos. x 55 LM = 110 LM + 3 x End Laps x 45 LM = 135 LM = Total LM = 245 x 22% corrugation Slope = 300 LM Grand Total LM = 698

**Office Block – Concrete Roof (Sr. 1 & 2)**

- Applying of EPDM 1mm thick with its adhesive at the substrate and termination sealing with German Adhesives complete in all respect.. Area # 175 Sq. Mtr. + 15% for the Wall Uplifting = 200 Sq. Mtr

Waterproofing of AC Penetrations with M1 German Sealant – 8 Nos.

**Roof # 1 – Metal Roof (Sr. 3 & 4)**

Total Area: 995 Sq. Mtr. consisting of 5,970 Screw Heads

Sealing of TOTAL END LAPS: Main Warehouse: End Laps x 4 Nos. x 55 LM = 220 LM x 22% corrugation Slope = 270 LM

**Roof # 2 – Metal Roof (Sr. 5, 6, 7, 8 & 9)**

Total Area: 2500 Sq. Mtr. consisting of 15,000 Screw Heads

Sealing of TOTAL END LAPS:  
1st Side: End Laps x 2 Nos. x 55 LM = 110 LM + 3 x End Laps x 45 LM = 135 LM = Total LM = 245 x 22% corrugation Slope = 300 LM

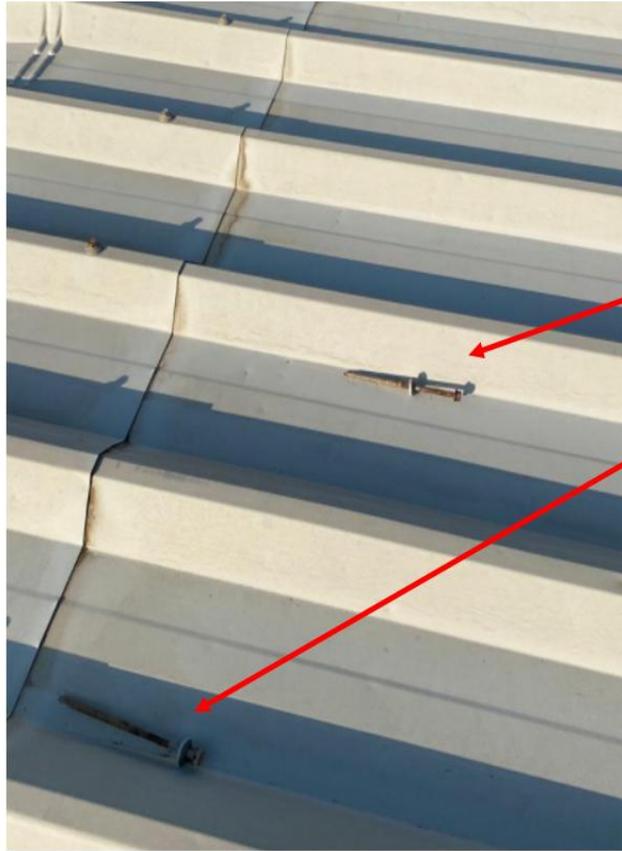

2nd Side: End Laps x 2 Nos. x 88 LM = 176 LM + 2 x End Laps x 75 LM = 150 LM = Total LM = 326 x 22% corrugation Slope = 398 LM Grand Total LM = 698

Replacement of old Damaged Flashing with the new 0.7mm thick Aluminium Flashing i.e. 300mm wide and 15 LM Long

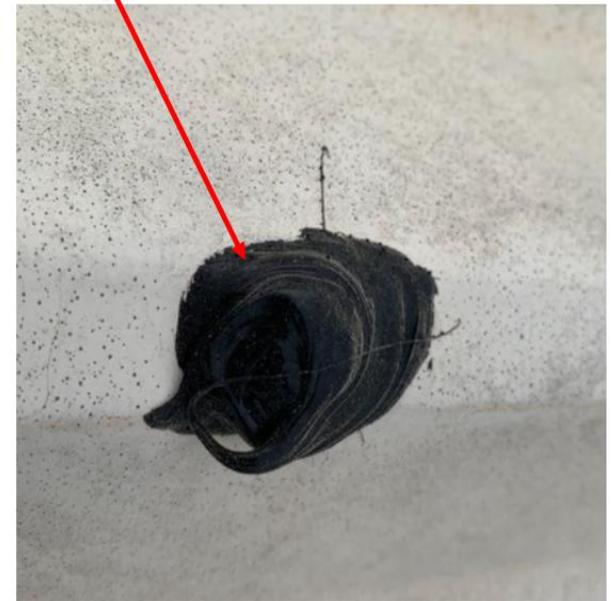

Both side flashing waterproofing = 15+15 LM = 30 LM

Replacement of damaged bended sheets with the new 0.7mm sheet of matching profile upto 25 LM and 2 Meter Wide

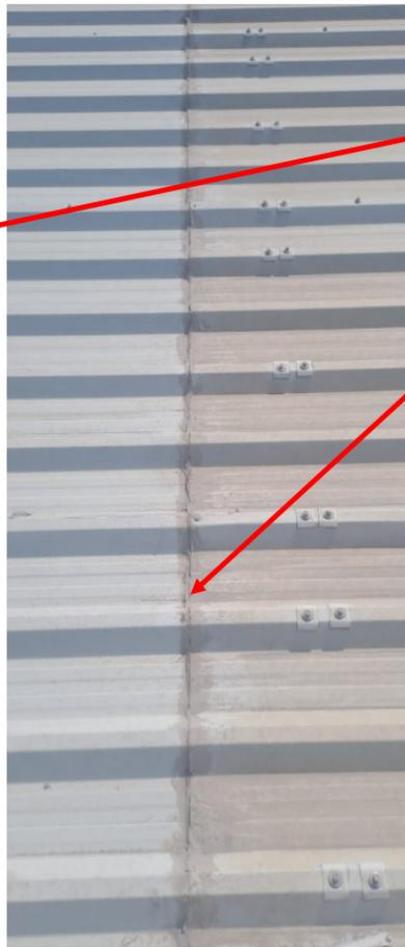

## CLEANING / SCREWS / RIVETS PROBLEM

There are many places where the screws are backed out and are missing including rivets as well. These need to be replaced with the new ones and sealed with our PROMAX Bonding Adhesive required to close the openings. Entire roof to be cleaned thoroughly, removal of existing coatings, replacement of damaged / torn out screws and rivets and then sealed properly on the entire roof

### END LAPS / HORIZONTAL JOINTS TREATMENT

Some END Laps / Horizontal joints are covered with a very low standard Jotun Coating (White) which has now torn apart since it is very hard now and also some areas nothing has been applied which results in joint gaps. There is rusting on the joints as well, The END Lap / Horizontal joint is the main leaking areas due to constant contraction and expansions due to thermal temperature change from day to night times and thus result in movement of 10mm in between the joints resulting in leakage / passage of air from these points.

These are to be treated by covering them with EPDM Rubberized Membrane and bonded using Promax Bonding Adhesive which can sustain upto 120 degree Celsius as well as will remain flexible at these points allowing the END Lap for their natural movement without breaking up at these points.

## SIDE LAPS / VERTICAL JOINTS TREATMENT

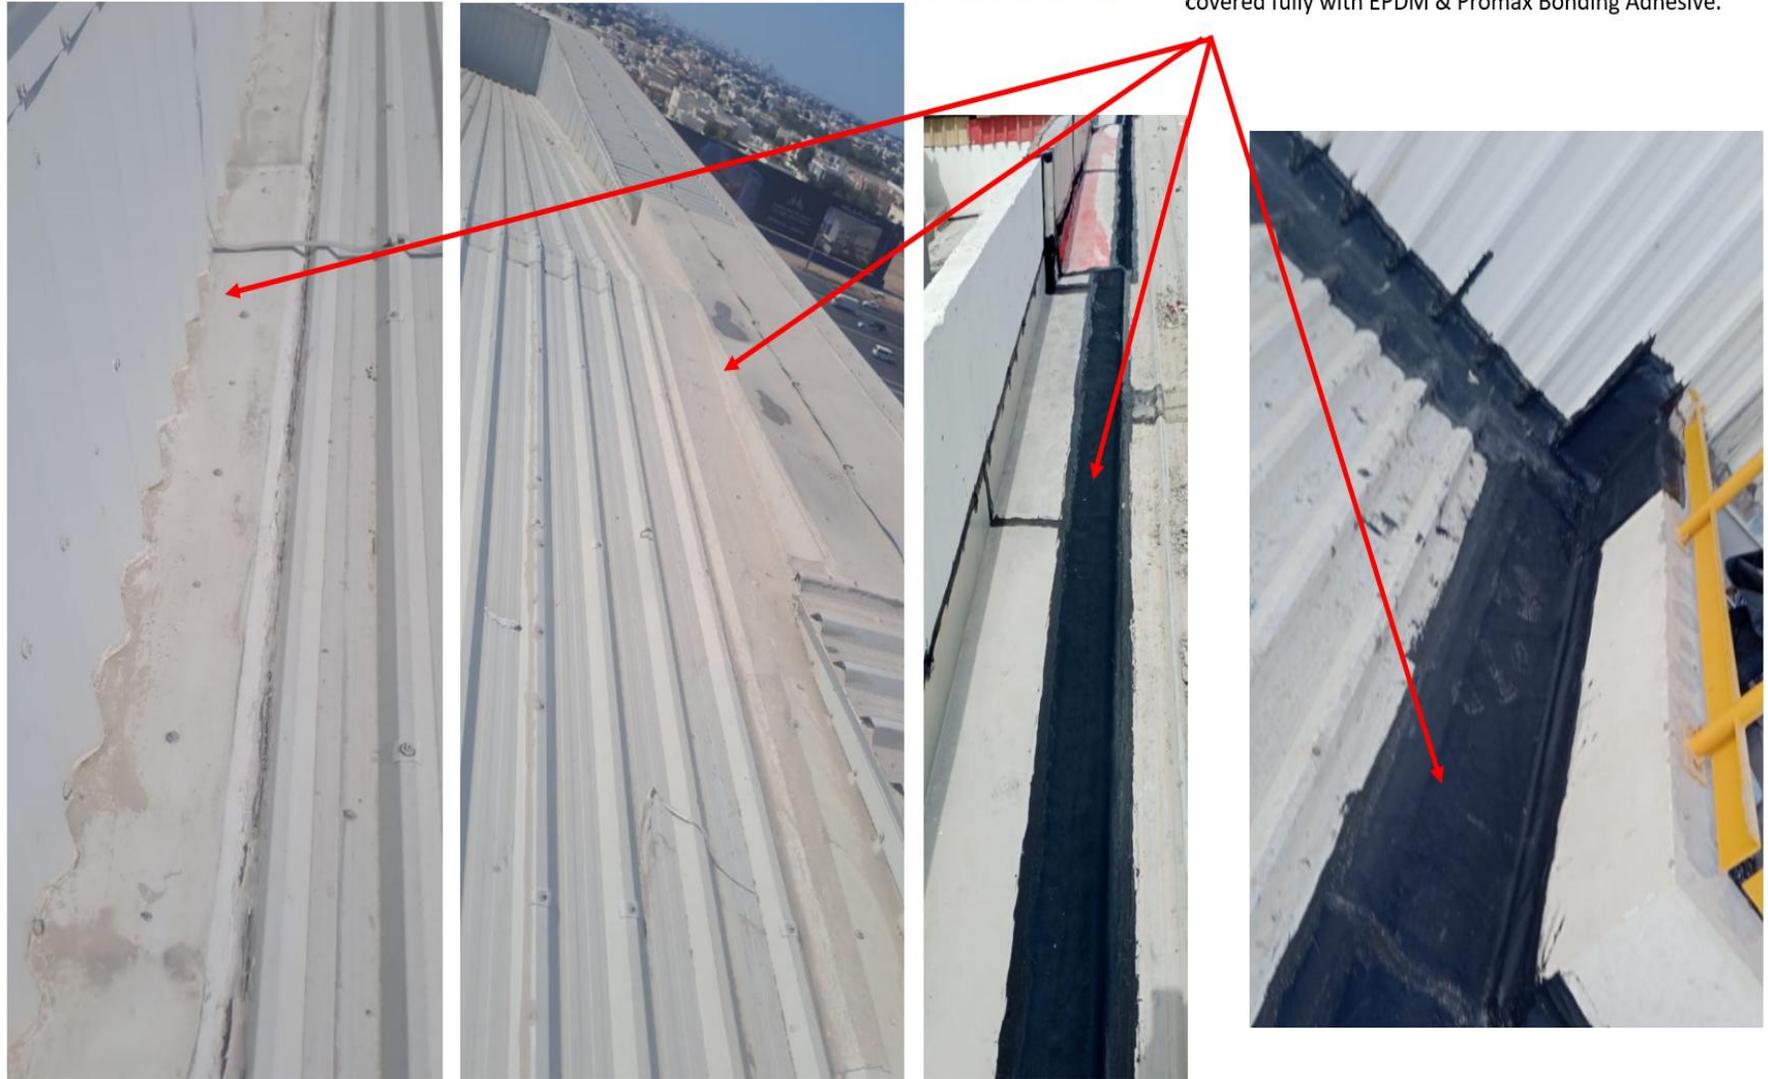

In heavy Rains, the Side laps also leak which comes after each 1 meter when overlapping width wise. These will also be sealed using Promax Bonding Adhesive only as shown below

## SIDE WALL FLASHINGS TREATMENT

The side wall or even metal side flashings will be covered fully with EPDM & Promax Bonding Adhesive.

## SKYLIGHT PROBLEM

There are total 32 Skylights. Each Skylight will consume = 3+3+1+1 LM = 8 LM of EPDM. Therefore, total EPDM Consumption for Skylights will be **256 LM**.

With ageing of the skylights, they are the most weakest part of the roof, as they are made up of fiber glass and Constant Sand / Silica / Moisture & Heat totally eats them out with the passage of time and then start to leak at the side joints. They will be sealed from all 4 sides with PROMAX EPDM Membrane with Promax Bonding Adhesive with tolerance of upto 120 Degree Celsius (Lab Test Report attached):

These joints will be treated with Imported PROMAX EPDM Membrane that is 400% elastomeric and these can be bonded with an Adhesive – **Promax Bonding Adhesive** that can withstand the harshest weather conditions and stays intact upto 120 Degree Celsius. This material has been verified and lab tested for 24 hours on 120 Degree Celsius (**copy enclosed**).

## FAN UNITS PROBLEM

There are total 4 Fan Units. Each Fan will consume = 4 LM of EPDM. Therefore, total EPDM Consumption for Fan Units will be **16 LM**.

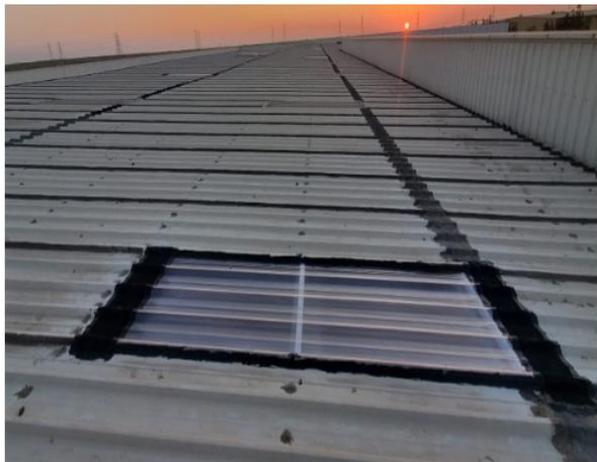

The Joints of the Fan Base Unit leaks due to constant movement and vibration from the fan units.

These joints will be treated with Imported PROMAX EPDM Membrane that is 400% elastomeric and these can be bonded with an Adhesive – **Promax Bonding Adhesive** that can withstand the harshest weather conditions and stays intact upto 120 Degree Celsius. This material has been verified and lab tested for 24 hours on 120 Degree Celsius (**copy enclosed**).

## SKY LIGHTS / DUCTS & CHIMNEY'S TREATMENT

All of these will be covered fully with EPDM & Promax Bonding Adhesive as shown below.

### EAVE GUTTER PROBLEM

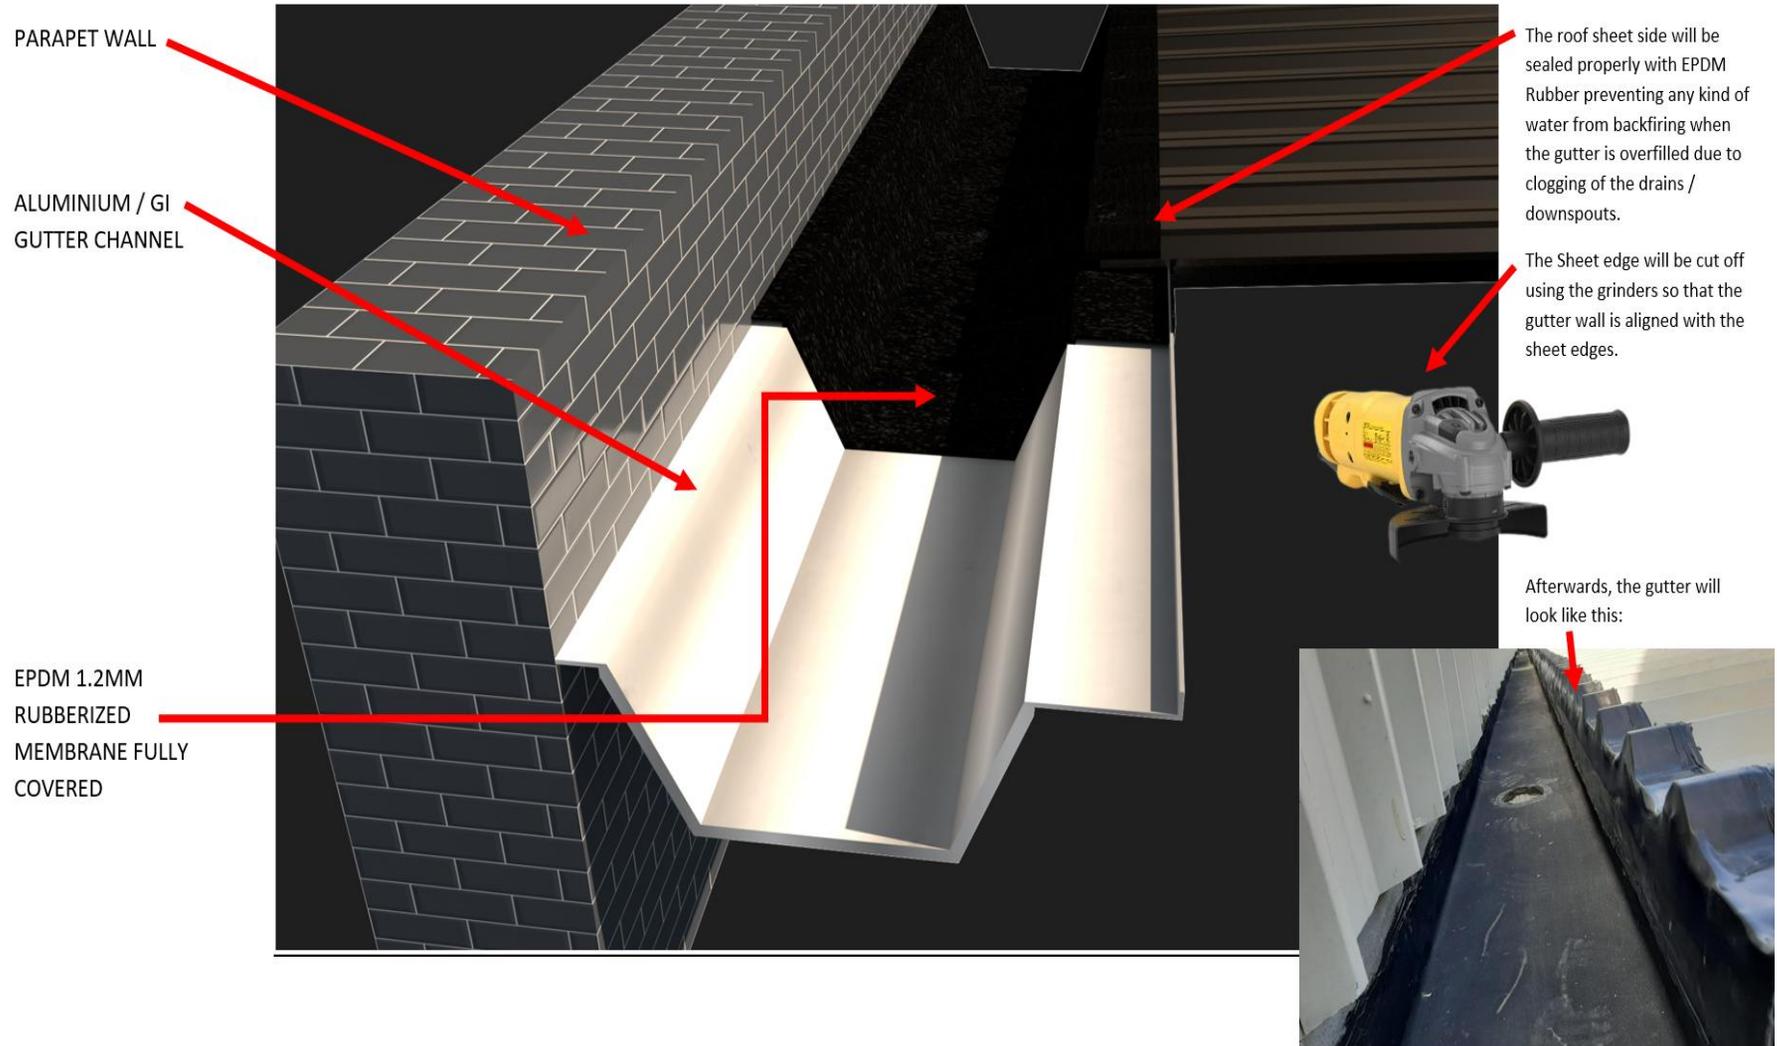

Both Eave Gutters are around **136 LM** and 300mm wide. All the downspouts are clogged up and it has heavy mud in it which needs thorough cleaning and Full Coverage with EPDM Membrane.

The termination under the sheets to be treated with **PROMAX EPDM Membrane** to prevent backfiring of the water when the gutter is clogged up as well as fully covered with EPDM Layer from wall to wall resulting in converting the entire gutter into a rubberized channel. The Drain Cowl also will be treated with **Promax Bonding Adhesive** preventing the leakage from the Pipe Core cut gap.

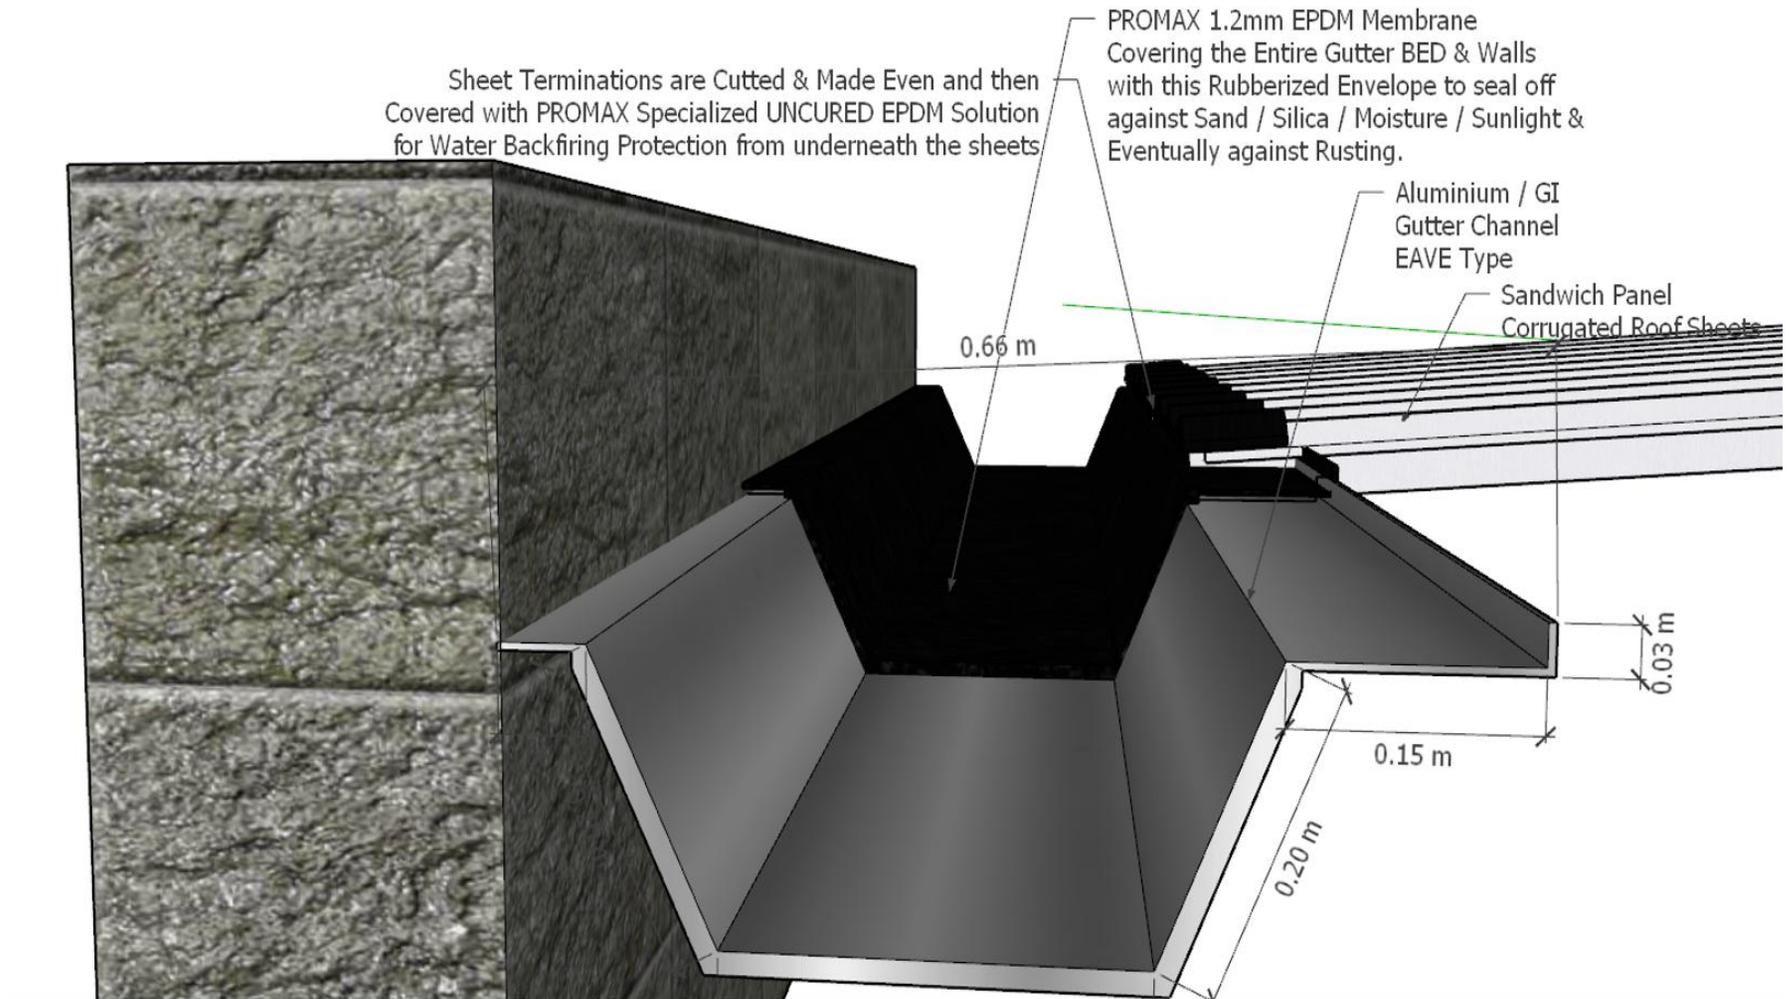

### EAVE GUTTER DEMONSTRATION 3D MODEL

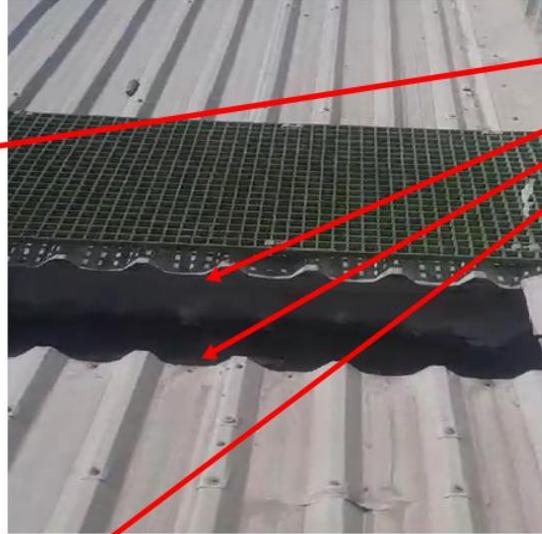

# INDUSTRIAL MAINTENANCE & WATERPROOFING EXPERTS

## ALL ROUND UAE & KSA REGION

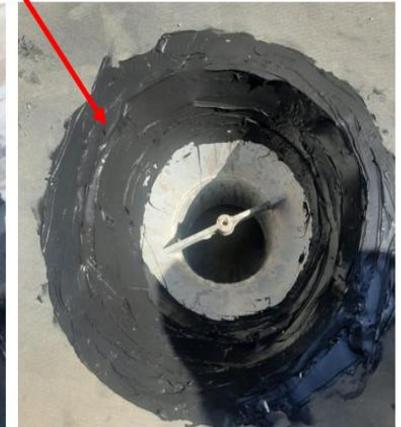

### VALLEY GUTTER PROBLEM

The Valley Gutter is same as Eave Gutter but it has roofs on both sides and both sides the sheet is coming. The widths are same as from 300mm to 400mm wide. All the downspouts are clogged up and it has heavy mud in it which needs thorough cleaning and Full Coverage with EPDM Membrane.

The termination under the sheets to be treated with **PROMAX EPDM Membrane** to prevent backfiring of the water when the gutter is clogged up as well as fully covered with EPDM Layer from wall to wall resulting in converting the entire gutter into a rubberized channel. The Drain Cowl also will be treated with **Promax Bonding Adhesive** preventing the leakage from the Pipe Core cut gap.

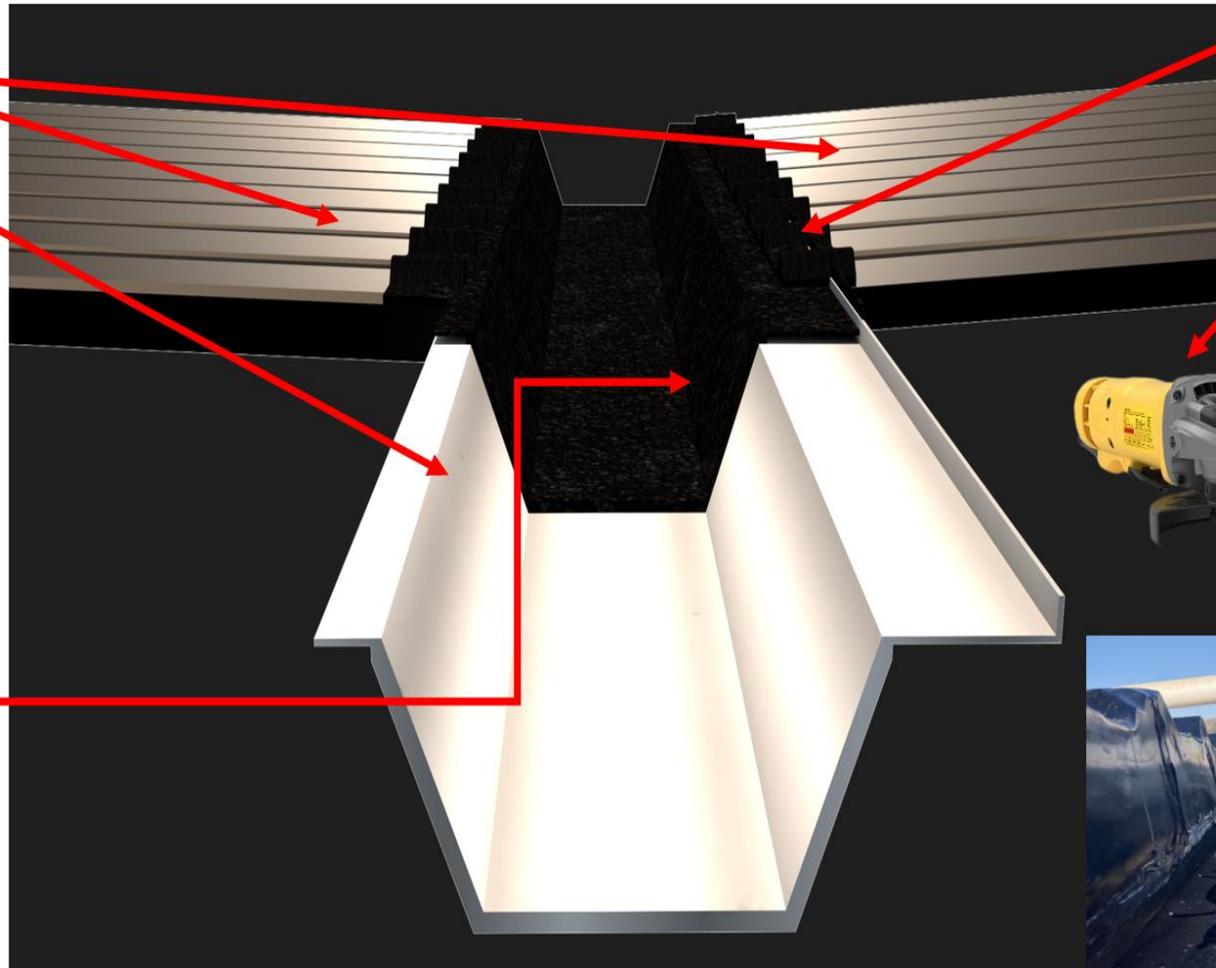

### VALLEY GUTTER DEMONSTRATION 3D MODEL

BOTH SIDES ROOF SHEETS

ALUMINIUM / GI GUTTER CHANNEL

EPDM 1.2MM RUBBERIZED MEMBRANE FULLY COVERED

Both roof sheet sides will be sealed properly with EPDM Rubber preventing any kind of water from backfiring when the gutter is overfilled due to clogging of the drains / downspouts.

Both Sheet edges will be cut off using the grinders so that the gutter wall is aligned with the sheet edges.

Afterwards, the gutter will look like this:

# INDUSTRIAL MAINTENANCE & WATERPROOFING EXPERTS ALL ROUND UAE & KSA REGION

## FULLY EPDM COVERAGE WITH RUBBERIZED MEMBRANE (15 YEAR WARRANTY)

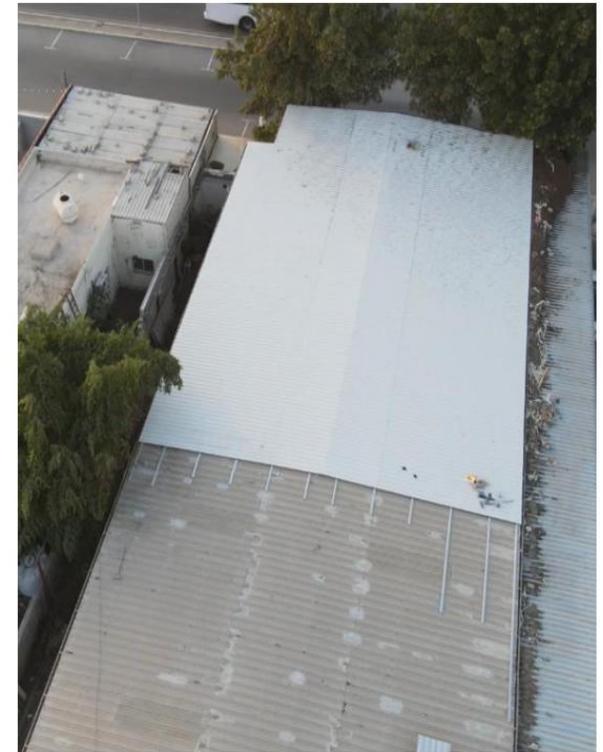

Fully Coverage of the existing roof using rubberized EPDM Membrane alongwith Promax Bonding Adhesive. This will have longer lifespan than the given warranty and will also stop the oxidization of the rusting as well as no need to stop your ongoing operations as this is fast / easy & reliable with a warranty of 10 years.

## REROOFING USING NEW SHEETS ON THE OLD DAMAGED ROOF

New Roofing by removal of existing roof sheets as well as Fabrication, Supply & Installation of new roof which will consist of 0.7mm single skin sheets Aluminium Pre-paint alongwith flashings and fixing accessories complete in all respect.

# INDUSTRIAL MAINTENANCE & WATERPROOFING EXPERTS ALL ROUND UAE & KSA REGION

**FULLY EPDM COVERAGE WITH RUBBERIZED MEMBRANE (20 YEAR WARRANTY SOLUTION FOR DAMAGED ROOFS)**

Fully Coverage of the existing roof using rubberized EPDM Membrane along with Promax Bonding Adhesive. This will have longer lifespan than the given warranty and will also stop the oxidization of the rusting as well as no need to stop your ongoing operations as this is fast / easy & reliable with a warranty of 10 years.

## PU ROOFING – SOLUTION

The treatment for this roof will be the most challenging one as this will consume a lot of labor and timing. The entire PU coating needs to be removed with specially designed crowbars for this purpose only, as to remove the coating in a way as not to damage the roof sheets which gets easily damaged if not done carefully. Then all the chipped off PU coating as shown below needs to be put in garbage bags and brought down at the garbage disposal area within the facility, so that the garbage trucks can come and take this away accordingly. Then afterwards EPDM solutions to be applied on all the End Laps + Screws + Gutters:

## AC PIPE PENETRATIONS – SPLASH – KING FAISAL SHARJAH

The AC Pipe Penetrations are covered with PU Coating / PU Spray which becomes porous as the foam is converted to powder due to constant interaction with UV rays. This should be removed and then sealed off properly with EPDM as shown here:

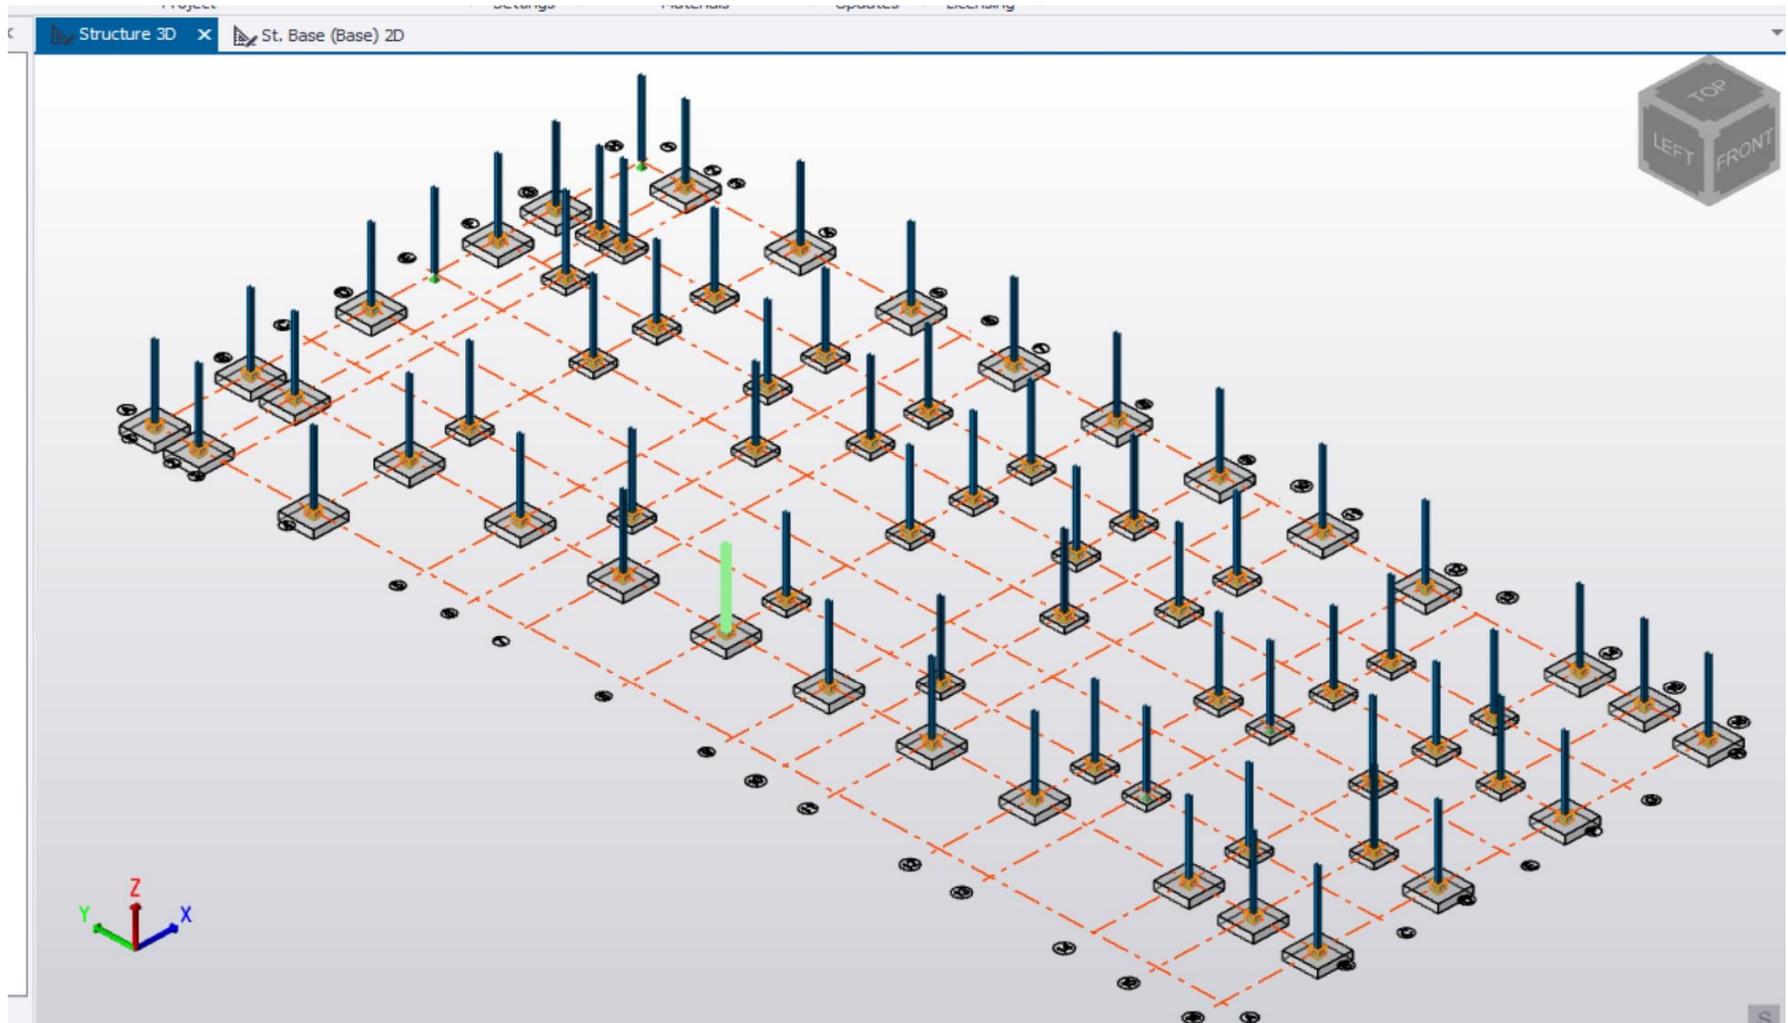

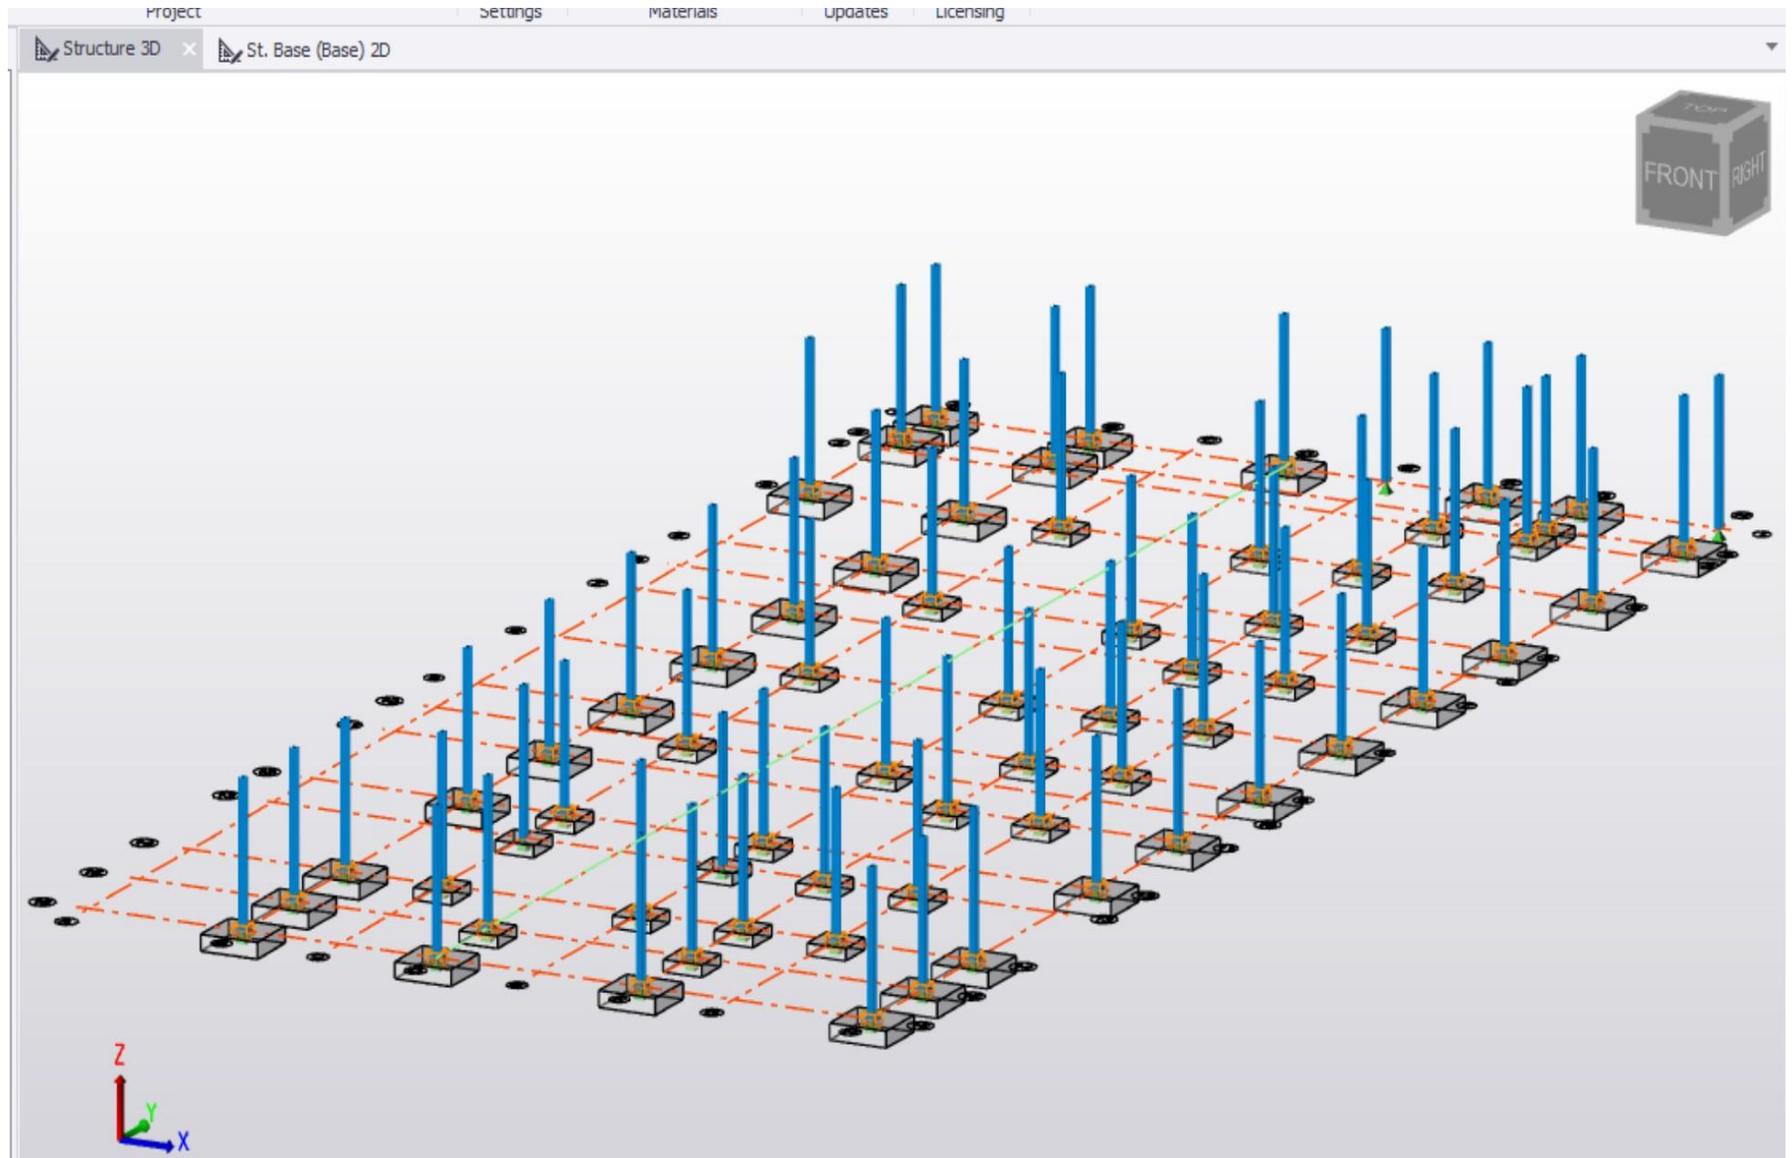

## GLASS DOME – SPLASH – ROLLA SHARJAH

The Glass Dome is leaking from all the joints, the current coating / sealants is peeling off. Therefore, they will be treated by applying 1.2mm thick EPDM and PROMAX Bonding Adhesive as shown here:

### Concrete Flooring / Foundations / Footings / Slabs Load Calculations as per International Standards:

<b>Promax Carpentry &amp; Flooring Contracting Co.</b> Office 505, 5th Floor, Block 3, Bin Shabib Mall, Al Qusais, Dubai, UAE	<b>Project:</b> Jabbel Al Wah - Belad - Top Max Architect Solutions <b>Section:</b> F1 Foundation Drawing & Details <b>Date:</b> 02/11/2025 <b>Drawn by:</b> Ahmed Tariq	<b>Job Ref.:</b> <b>Sheet no. Rev.:</b> 2 <b>Appr. by:</b>
----------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------

**Column no.1 details**

- Length of column  $l_1 = 250$  mm
- Width of column  $l_2 = 250$  mm
- position in x-direction  $x_1 = 1100$  mm
- position in y-direction  $y_1 = 1100$  mm

**Soil properties**

- Density of soil  $\gamma_{soil} = 18.0$  kN/m<sup>3</sup>
- Characteristic cohesion  $c_k = 0$  kN/m<sup>2</sup>
- Characteristic effective shear resistance angle  $\phi_k = 30$  deg
- Characteristic friction angle  $\delta_k = 20$  deg

**Foundation loads**

- Permanent surcharge load  $F_{sur} = 180.0$  kN/m<sup>2</sup>
- Self weight  $F_{sw} = \rho \cdot h \cdot \gamma_{con} = 13.8$  kN/m<sup>2</sup>
- Soil weight  $F_{sw} = \rho_{soil} \cdot h_{soil} \cdot \gamma_{soil} = 10.8$  kN/m<sup>2</sup>

**Column no.1 loads**

- Permanent axial load  $F_{ax} = 25.0$  kN
- Variable axial load  $F_{ax} = 180.0$  kN

**Design approach 1**

Partial factors on actions - Combination 1

- Partial factor set A1
- Permanent unfavourable action - Table A.3  $\gamma_G = 1.35$
- Permanent favourable action - Table A.3  $\gamma_G = 1.00$
- Variable unfavourable action - Table A.3  $\gamma_Q = 1.50$

<b>Promax Carpentry &amp; Flooring Contracting Co.</b> Office 505, 5th Floor, Block 3, Bin Shabib Mall, Al Qusais, Dubai, UAE	<b>Project:</b> Jabbel Al Wah - Belad - Top Max Architect Solutions <b>Section:</b> F1 Foundation Drawing & Details <b>Date:</b> 02/11/2025 <b>Drawn by:</b> Ahmed Tariq	<b>Job Ref.:</b> <b>Sheet no. Rev.:</b> 2 <b>Appr. by:</b>
----------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------

**Effective strength factor**

- $\eta = 1.00$
- Bending coefficient  $k_1 = 0.40$
- Bending coefficient  $k_2 = 1.00$   $\gamma_k \cdot (0.6 + 0.0014 \cdot l_{col}) = 1.00$
- Bending coefficient  $k_3 = 0.40$
- Bending coefficient  $k_4 = 1.00$   $\gamma_k \cdot (0.6 + 0.0014 \cdot l_{col}) = 1.00$

**Reinforcement details**

- Characteristic yield strength of reinforcement  $f_{yk} = 500$  N/mm<sup>2</sup>
- Modulus of elasticity of reinforcement  $E_s = 210000$  N/mm<sup>2</sup>
- Partial factor for reinforcing steel (Table 2.1N)  $\gamma_s = 1.15$
- Design yield strength of reinforcement  $f_{td} = f_{yk} / \gamma_s = 435$  N/mm<sup>2</sup>
- Nominal cover to top of foundation  $c_{top} = 30$  mm
- Nominal cover to bottom of foundation  $c_{bot} = 30$  mm
- Normal cover to side of foundation  $c_{side} = 30$  mm

**Rectangular section in flexure (Section 6.1)**

- Characteristic yield strength of reinforcement  $f_{yk} = 500$  N/mm<sup>2</sup>
- Design bending moment  $M_{Ed} = 65.6$  kNm
- Depth to tension reinforcement  $d = h - c_{top} - d_{bar} / 2 = 512$  mm
- $K = M_{Ed} / (b \cdot d^2 \cdot \eta \cdot f_{td}) = 0.004$
- $K' = (2 \cdot \eta \cdot \gamma_k \cdot \gamma_{sur} + \gamma_k \cdot (1 - \eta) \cdot \gamma_k \cdot (2 \cdot \eta + K)) / (2 \cdot \eta \cdot (1 - \eta) + K)$
- $K' = 0.207$
- Lever arm  $z = \min(D \cdot 0.5 + 0.5 \cdot \eta \cdot (1 - 2 \cdot \eta) \cdot K' / (\eta \cdot \gamma_k \cdot \gamma_{sur} + \gamma_k \cdot (1 - \eta) \cdot \gamma_k \cdot (2 \cdot \eta + K)), D \cdot 0.95) \cdot d = 486$  mm
- Depth of neutral axis  $x = 2.5 \cdot (d - z) = 64$  mm
- Area of tension reinforcement required  $A_{s,req} = M_{Ed} / (\eta \cdot \gamma_k \cdot z) = 310$  mm<sup>2</sup>
- Tension reinforcement provided  $A_{s,prov} = 16 \cdot b \cdot \text{bars} \cdot \phi = 2413$  mm<sup>2</sup>
- Minimum area of reinforcement (exp. 9.1N)  $A_{s,min} = \max(D \cdot 0.26 \cdot \eta \cdot \gamma_k \cdot f_{yk} / f_{td}, 0.0013 \cdot \eta \cdot l_y \cdot \gamma_k \cdot d = 1697$  mm<sup>2</sup>

## DRONE SURVEY'S FOR CONDUCTING THOROUGH INVESTIGATION OF THE PROBLEMS

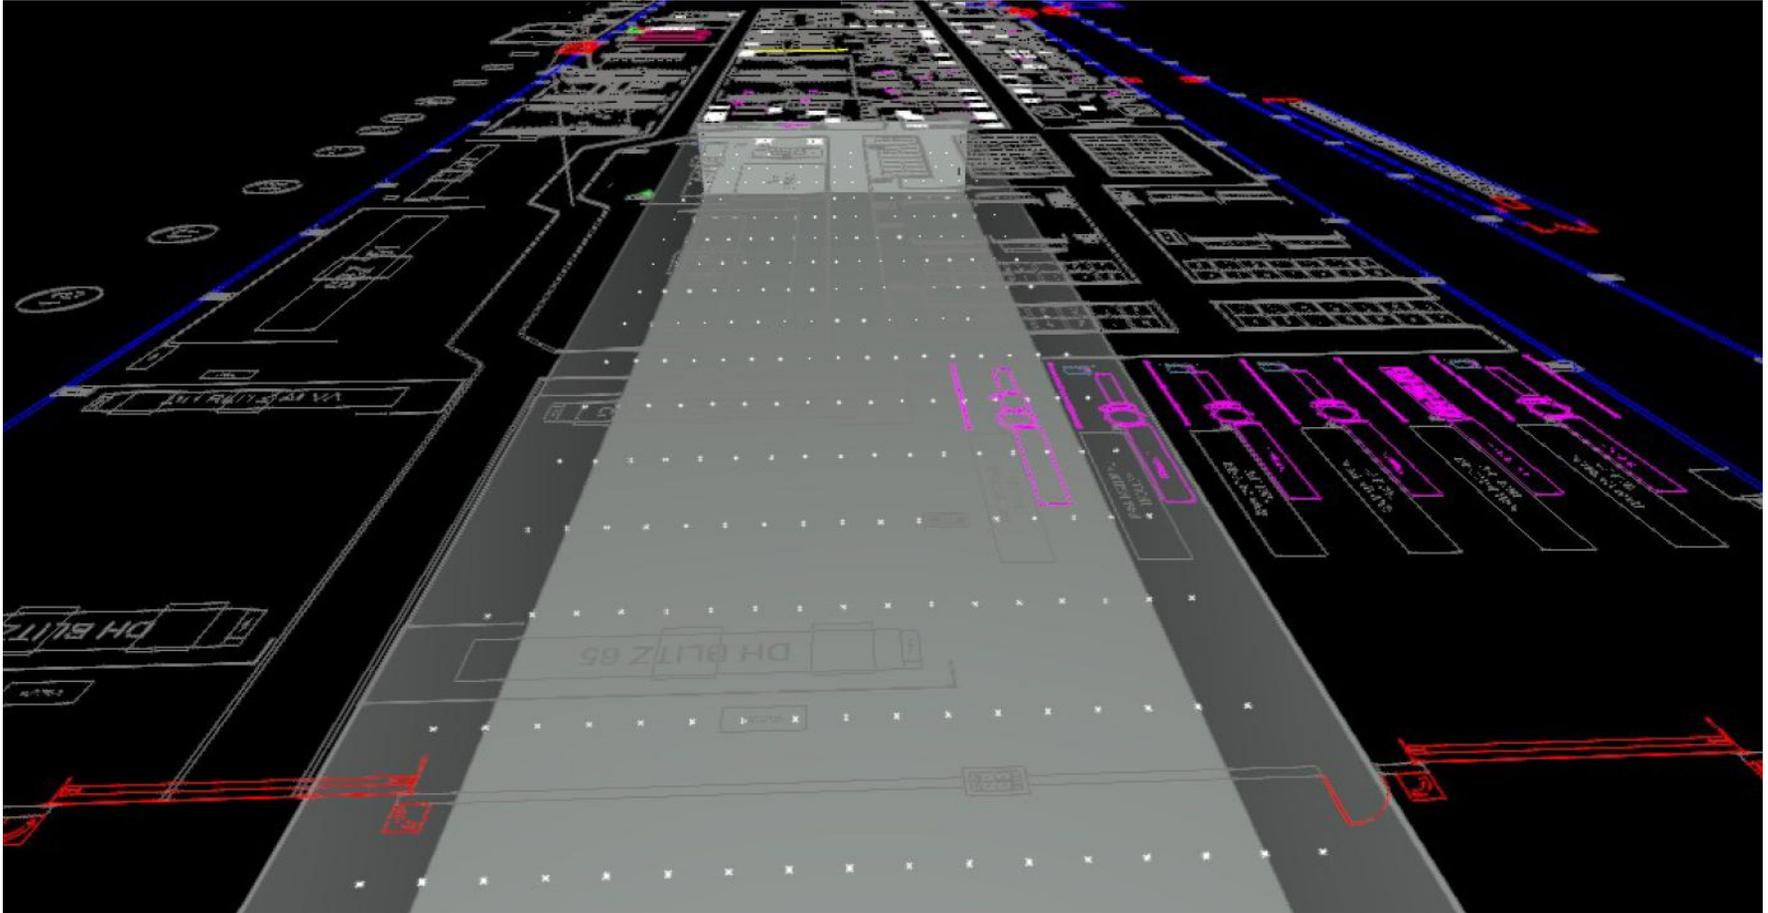

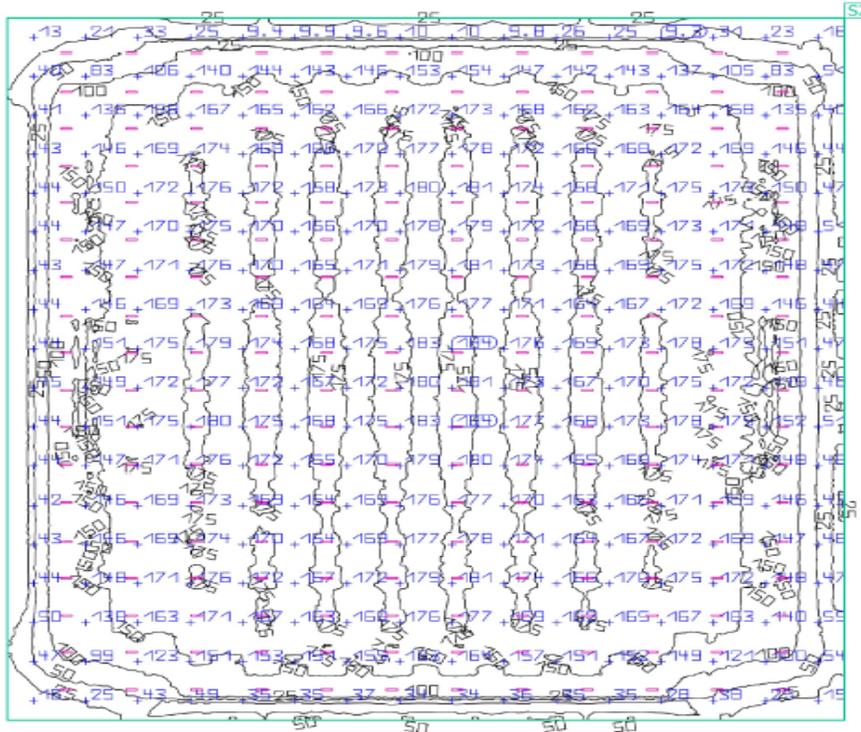

We provide state of the art lighting calculations using 3D simulations and payback calculation sheets to bring down overall load consumption, which helps in the Green Planet Initiative for the Industrial buildings and helping them shift on Clean Renewable Solar Energy Solutions from the existing electricity grid:

Properties	$\bar{E}$ (Target)	$E_{min}$	$E_{max}$	$g_1$	$g_2$	Index
Workplane (Shed 2 - Small Shed) Perpendicular illuminance (adaptive) Height: 0.000 m, Wall zone: 0.000 m	138 lx (≥ 20.0 lx) ✓	4.84 lx	186 lx	0.035	0.026	S2

Utilisation profile: Parking areas, Heavy traffic, e.g. parking areas of schools, churches, major shopping centers, major sports and multipurpose building complexes
